

Course title	Fire Stopping/Fire Compartmentation awareness (QFD072)
Duration	2 Hours (questions dependent)
Aim	To increase knowledge and awareness of importance of Fire Compartmentation and fire stopping requirements.

Objectives

- Discuss Industry guidance.
- Explain the role of fire compartmentation.
- Discuss Fire Protection of cavities.
- Explore Fire Stopping requirements.
- Provide Practical examples.
- Identify Fire Compartmentation FRMS
- Highlight benefits of Third-party certification.

This presentation provides a basic level of knowledge, awareness and understanding for staff who may be expected to manage fire compartmentation in buildings (excluding fire doors). It discusses key areas surrounding fire compartmentation requirements and visual identification of non-conformities in order to deliver compliance requirements.
